Raw Korean data
72,856; 13 fields
Six quality rules
Quarantined
3,286 sessions
Retained
69,570 sessions
Nine SQL queries
Full dataset; pandas checks
137 predictors before encoding
Eligible completed histories
Seven families + two baselines
Original CV / common-input nested CV
Identity / history ablation
Fixed LightGBM; same folds
Original blend: later-date test
Nested CV: development windows only
